INNOVATIVE SOLUTIONS TO ENSURE QUALITY, SAFETY AND SUSTAINABILITY FOR ALL SPECTRUM OF INDUSTRIES
We conduct EHS audits, customised risk assessment (qualitative and quantitative) to our customers. The hazard identification is conducted by walk-through survey of the facility to identify and list out the potential hazards in the following basic hazard categories included but not limited to Penetration, Impact, Chemical, Harmful dust, Compression (roll-over), Heat/cold, Light (optical) radiation and biological hazard.

We independently and impartially perform inspection (Initial, periodic, Installation and exceptions) at every stage of your equipment, instruments, systems, process and procedures comply with regulation(s), code(s), requirement(s), manufacturer recommendation(s) and standard(s).

TRAINING:

We provide Health and Safety class room training courses. These courses are industry specific and ranges from foundation level through advanced courses to gain and continue your professional development. For several years, DARLSCO has developed health and safety programs for clients and conducted training that helps workers understand making safe choices benefits them and their employers.

We conduct examination and certify amusement ride operator included but not limited to Funfair Safety Officer, Funfair operation supervisor, Ride Operator, Ride/device attendant, Amusement equipment technician, Soft play area attendants, Skill games and arcade games attendants, Rescue and Evacuation Personnel to ensure quality and safety whilst operation of the ride for public use.

AUDITS AND SYSTEMS CERTIFICATION:

We conduct EHS audits, customised risk assessment (qualitative and quantitative) to our customers. The hazard identification is conducted by walk-through survey of the facility to identify and list out the potential hazards in the following basic hazard categories included but not limited to Penetration, Impact, Chemical, Harmful dust, Compression (roll-over), Heat/cold, Light (optical) radiation and biological hazard.

We customise water parks as per the customer requirement. The parameters considered are pool size, depth, Capacity and with scenic view. We install with high standard of safety with 1-2 days TAT. We deploy divers for periodic maintenance to facilitate smooth operation.

District Commissioning and Maintenance:

We provide Health and Safety class room training courses. These courses are industry specific and ranges from foundation level through advanced courses to gain and continue your professional development. For several years, DARLSCO has developed health and safety programs for clients and conducted training that helps workers understand making safe choices benefits them and their employers.

CORE VALUES

Dedicated service to customer(s) / client(s)
Driving solution to complex problem
Realistic in approach and methodologies
Leaders in trend setting
Systematic Approach and quality deliverables
Obedience with statutory authorities and clients
Oustreach to comply with QHSE requirements
